

# Windows Handheld Apps

## What is Windows Embedded Handheld 6.5 ?

It is an enterprise handheld device targeting delivery companies, retailers and other companies that rely on handheld computing - ones which run on mobile computers or PDAs, usually rugged for use in the field to process transactions at the site of the customer with minimal usage of paper.

## How is it related to Windows Mobile 6.5 ?

Windows Embedded Handheld 6.5 **has been built on** Windows Mobile 6.5 platform and share **the same application development environment**. This provides developers familiar tools like **Visual Studio** and **.NET Compact Framework** to leverage their existing knowledge and develop various applications on windows handheld devices.
