

Mindfire Solutions develops a CRM 2011 plug-in.

26th Dec, 2011, Bhubaneswar: It has hardly been few days of the release of a DNN module for financial market by Mindfire Solutions and they have again come up with another product. This time Mindfire has developed a plug-in named “Multi Lead Address Holder” that is compatible with MS Dynamics CRM 2011. This plug-in can hold multiple addresses for a single lead.

As we know that, Dynamics CRM 2011 allows holding one address per lead, Mindfire’s CRM team aimed at overcoming the barrier of adding more number of addresses through this plug-in. Apart from this feature of the plug-in there are certain other features as well like assigning the address to accounts after the particular lead gets qualified and converted into accounts, supporting “Account Entity” that allows to display the lead address in the converted account entity, easy to integrate and use. This CRM 2011 plug-in was developed internally by two of our able CRM developers Puja Jain & Anish Ku. Thakur. Mindfire has previously released a CRM interface named “Quick Add Update”, which received a lot of acclamation from the users.

Area Delivery Lead for CRM, Mr. Nirmal Hota said that, this CRM plug-in was a small contribution from the entire CRM 2011 team at Mindfire Solutions to the CRM community and that they would definitely keep looking for such opportunity which will lessen the effort and increase the efficiency of CRM users. Mr. Ansuman Sahu, Project Manager, Mindfire Solutions stated that, “I am happy with the interest and effort that the CRM team has shown in developing this plug-in. I would definitely wish them luck and hope that they would come up with such new innovative products in future.”
