Microsoft Dynamics CRM Solution Deployer

Introduction :

Dynamics CRM 2011 Solutions are packages of customizations that allow you to build and maintain Dynamics CRM/xRm applications. In order to deploy the solutions, the CRM users need to manually move them (export/import) from one organization to another or from one server to another.

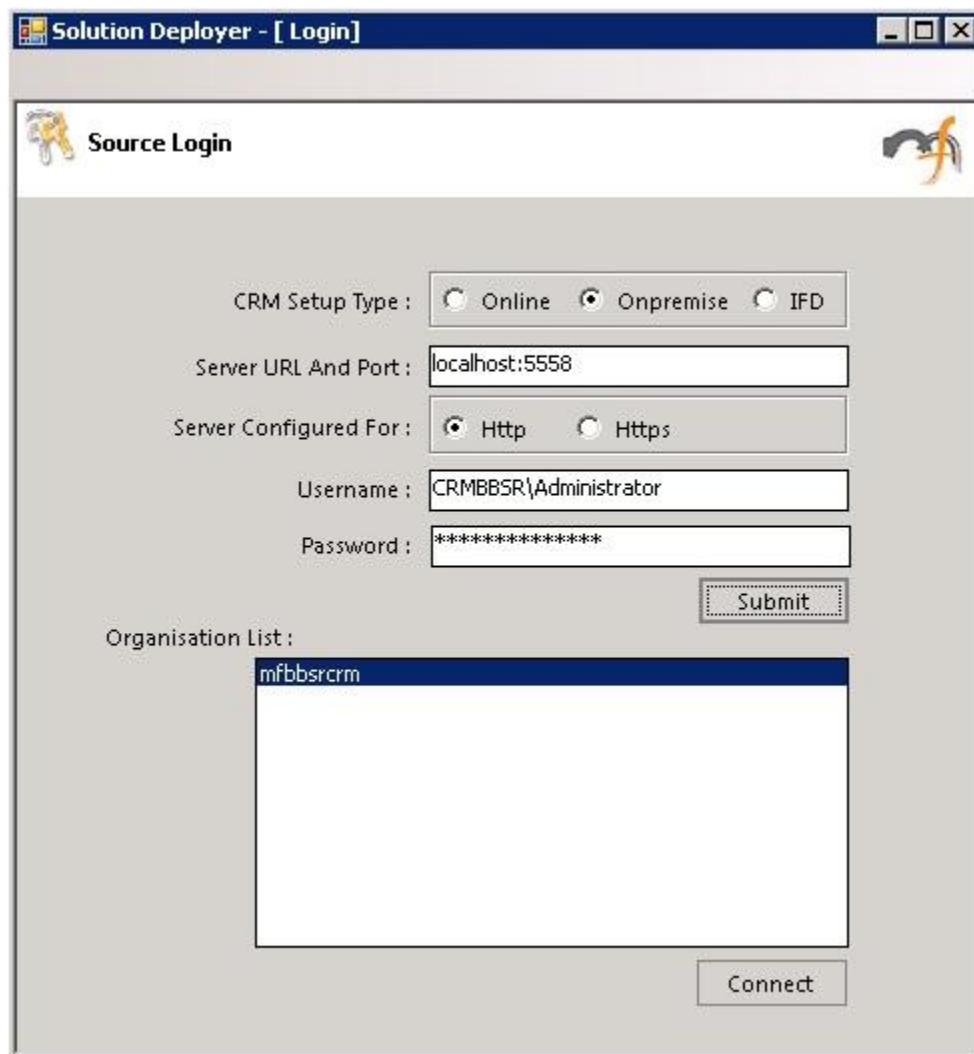

The **Solution Deployer** is a very user friendly and easy to use application that allows the users to install a CRM solution automatically for them. The Utility pick the solution from one organization/server and install it on another one. It basically performs 3 simple steps.

- ➔ Connect to the Source Server
- ➔ Select the Solution
- ➔ Connect to the Target Server

Microsoft Dynamics CRM Solution Deployer

Connect to the Source Server

- Enter the information of the source CRM Server like, URL, User Name, Password etc and click Submit to get the organization lists.
- Select the organization and click Connect.

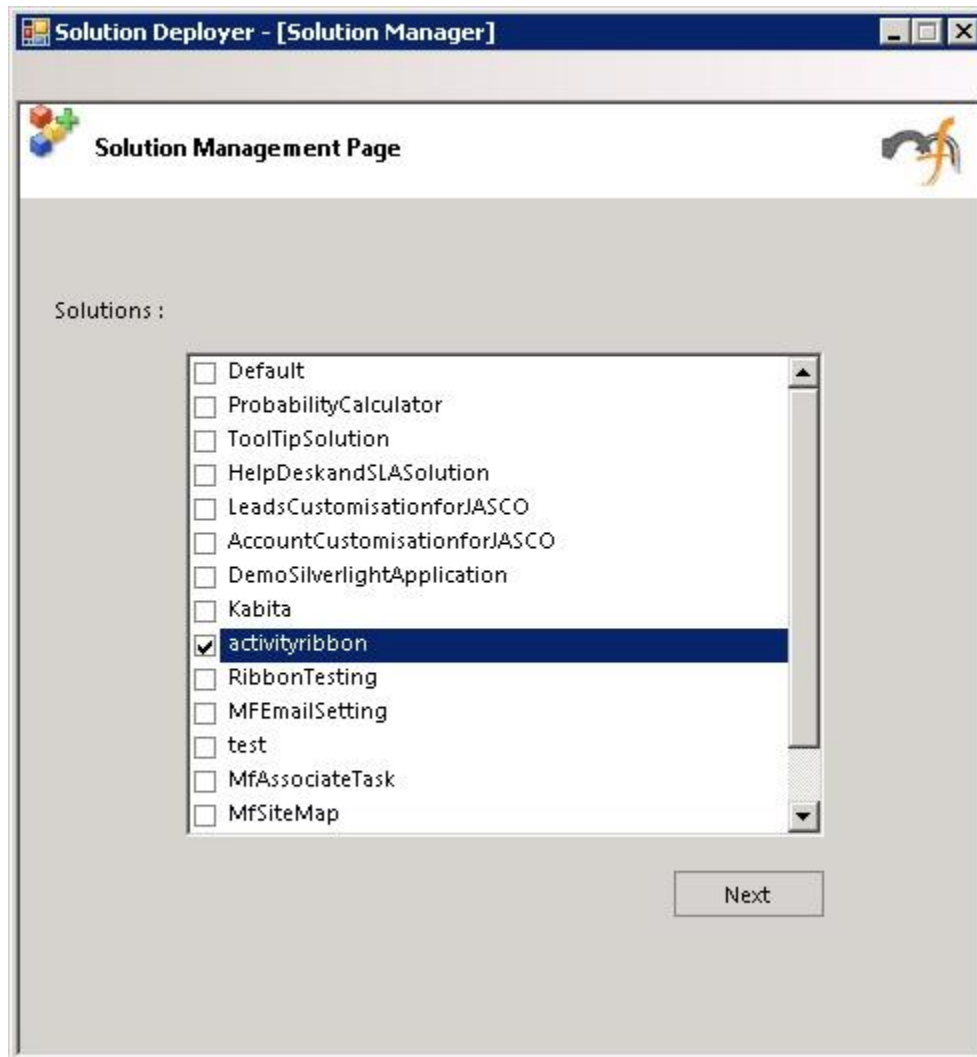

The screenshot shows a window titled "Solution Deployer - [Login]". Inside the window, there is a "Source Login" section with the following fields and controls:

- CRM Setup Type : Online Onpremise IFD
- Server URL And Port : localhost:5558
- Server Configured For : Http Https
- Username : CRMBBSR\Administrator
- Password : *****

Below these fields is a "Submit" button. Underneath the "Submit" button is the "Organisation List" section, which contains a list box with the entry "mfbbsrcrm". Below the list box is a "Connect" button.

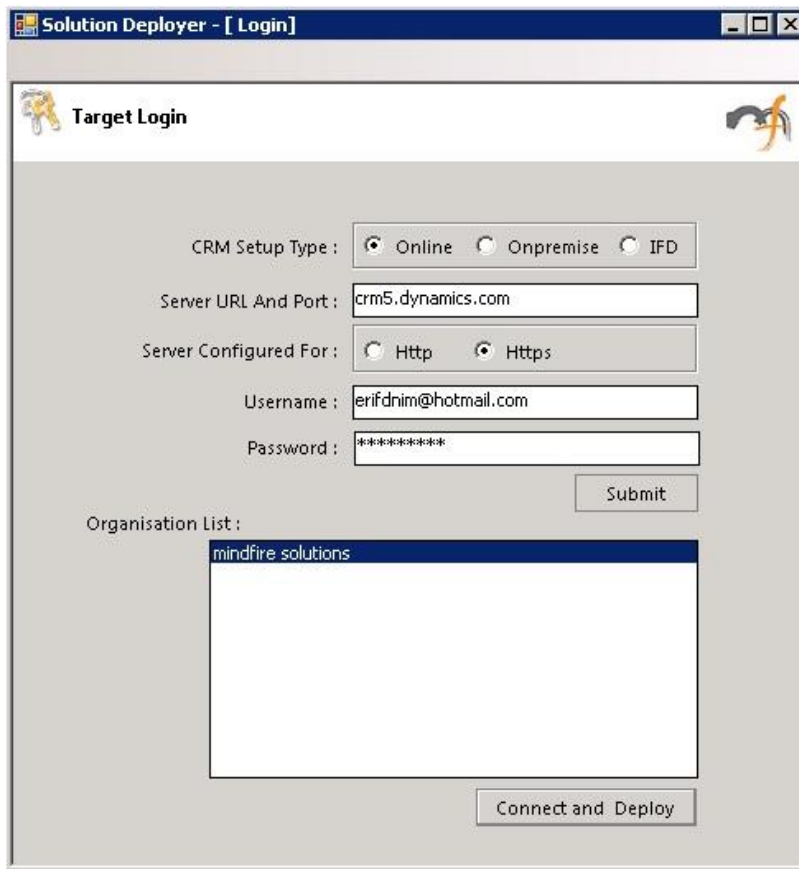

Select the Solution

- The Solutions list will get populated in a list box.
- Select the solutions to be installed and click Next.

Connect to the Target Server

- ➔ Enter the information of the Target CRM Server like, URL, User Name, and Password etc to get the organization lists.
- ➔ Select the organization and click Connect & Deploy.

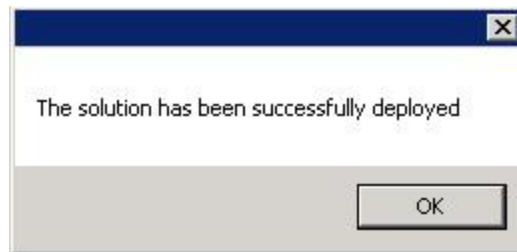

The screenshot shows a window titled "Solution Deployer - [Login]". The window contains a "Target Login" section with the following fields and options:

- CRM Setup Type: Online Onpremise IFD
- Server URL And Port:
- Server Configured For: Http Https
- Username:
- Password:

Below the form is a "Submit" button. Underneath, there is an "Organisation List:" section with a list box containing "mindfire solutions". At the bottom right of the window is a "Connect and Deploy" button.

Microsoft Dynamics CRM Solution Deployer
