

Experience Sharing: Tech-Ed 2010 Bangalore

Personal Exp. of a Mindfirean who attended the Biggest Tech Conference in 2010

Attending Microsoft Tech-Ed 2010 was a great experience of my professional life. I got an opportunity to meet and interact with many experienced people, which made me very much excited. I learnt many new and upcoming technologies & new features of VS 2010, Windows Azure etc. In addition, I also learnt how Microsoft is looking forward to enhance its support to native codes.

They presented many features of Bing too :

- Photosynth
- Quick preview of any website
- Filtering of images
- Search Refinement functionality etc.

At Tech-Ed, there is more in one place than anywhere else. It is like putting all information under one roof. I learnt many stuff that I normally do in my daily day to day job. Information that I collected at Tech-Ed would surely help me in a lot in my discussions with client and in my work output. It was the ideal mix of targets for me and all at one place. I did not find a few sessions very informative but a majority of the session were indeed very interesting and full of information.

Most of the sessions were great but I liked two sessions most:

- One session was on "**Say hello to ASP.NET 4.0 - Next generation of Web Development**" by **Harish Ranganathan**
- And the other was keynote session on "**Impact of Information Technology on the Indian Society**" by **Dr. Sam Petroda (Development thinker, Inventor and Entrepreneur)**

And to people who are going to join Mindfire, I can say that if you are looking for a company which ensures your learning and your career growth, Mindfire is the place to be. **Mindfire** provides numerous such opportunities to attend these technical events. In Mindfire, you will feel that you are working in an educational environment. Welcome Aboard!

My trip to Bangalore was good, though could not get much time to go sight seeing in Bangalore. But, the purpose for which I went to Bangalore was completely fulfilled.

Overall it was awesome and I just loved it. I will look forward to attending these types of events in future.

Thanks Mindfire for providing this great opportunity.
