Blockchain Expertise

We specialize in harnessing the potential of decentralized ledgers to revolutionize operations, enhance security, and drive efficiency. Unlock innovative blockchain solutions and propel your business forward.

Our services are aligned to your company's goals:

Proof-of-Concept >> Prototype >> MVP
- ascertain feasibility and value of idea
- finalize the core functionalities
- deliver and measure value proposition

Solution Architecting :
- choice of platform
- deployment strategy

Platform Solutions :
- Ethereum Smart Contracts and DApps
- customized, cross-industry Blockchain Tools and Apps using Hyperledger

Testing :
- end-to-end DApps testing

Tech Stack

Platform: Ethereum, Hyperledger, EOS, Polkadot
Programming Languages :
- Rust
- Ethereum/EOS: Solidity, C++
- Hyperledger: Java, Golang
- Interfacing with Node: Python, Golang, Javascript, Typescript

SDK & Tools : EOS SDK , Remix(IDE), Truffle, Ganache, Metamask,
                        Infura, Web3.js, ethers.js

Frameworks: Substrate, Truffle, Hardhat
Integration: Web3 wallets, Infura, Alchemy, CoinMarketCap, IPFS, Chainlink

We have built solutions for

Loyalty / Retail / Ecommerce

Smart Contracts

Healthcare

NFTs (ERC721)

Blockchain-based systems are transformative. Organizations deploy them to build stellar capabilities, overcome cumbersome practices, and infuse synergy. We develop solutions ground up or modify as need be.

WRITE TO US IF YOU

- desire to develop public, out-of-the-box applications

- use third-party open-source tools/packages

- are unwilling to keep your private data on public Blockchain platforms

- define your unique Blockchain infrastructure

- customize Blockchain apps according to your needs

- want to use in-house tools supported by top companies

- desire an MVP in quick time

- need to overhaul your enterprise business processes

- are thrilled about using a system that can't be hacked or changed
