

# Interoperability Expertise

We build solutions to assist secure exchange and interpretation of healthcare information across all concerned stakeholders in the healthcare ecosystem.

## Providers

- Direct/Query-based/Patient-mediated Information exchange with Providers
- Develop FHIR-based APIs
- EHR Interoperability Solutions
- Facilitate Care Transition : ADT Notifications
- Bi-directional information exchange with HIEs, Labs, Pharmacies & Payers

## Patients

- Real-time access to Complete Patient records -
- Interfaces to pull fragmented Patient data - from Multiple Providers
- Exchange Information with Payers -
- Push Patient Information into Portals/Apps -
- Enable Secure Patient-information Exchange -
- Custom build SMART on FHIR Apps -

## Payers

- Custom FHIR APIs for Patient/Provider Apps
- Bi-directional information Exchange with HIEs
- Payer-Payer Data Exchange
- FHIR-based APIs for Legacy Systems

# Technology Solutions

- Develop SMART on FHIR Apps
- HIPAA-compliant communication
- Interface with all leading Integration Engines
- FHIR APIs for Legacy Systems
- Build and monitor Interfaces for Secure data exchange
- Compliance to mandated standards
  - Content: C-CDA, HL7, FHIR, ASC X12
  - Transport: DICOM, XDR, XDM
- IoMT device interoperability
- Leverage Cloud-based APIs for FHIR
- Hosting: Cloud-based, Cloud-native, On-premise
- App Type: Mobile, Web, Cross-Platform
